PREFACE TO THE FIRST EDITION.

The Illustrated Edition of Mr. Bentham's "Handbook of the British Flora" being exhausted, the wood-engravings of that work are here reproduced as an Illustrated Companion to the "Handbook" and other British Floras. The cuts are arranged according to the last Edition of the "Handbook," and new cuts of the species admitted in recent Editions are added. To facilitate reference from other Floras, where the nomenclature differs from that of the "Handbook," synonyms, in italics, are incorporated in the Index. In this volume and the "Handbook" combined, Students will have, in a more convenient and portable form, all that the Illustrated Edition contained, at little more than one-third the cost.

PREFACE TO THE SECOND EDITION.

The exhaustion of a large Edition of this work in the course of a few years is a gratifying proof of its utility to, and appreciation by, Students of Botany, and has encouraged the Publishers, in preparing a new Edition for the press, to endeavour to render it still more useful and worthy of the patronage it has already received. In the present Edition five new cuts have been added, and the whole have been rearranged according to the New Edition (the Fifth, just published) of Bentham's "Handbook" as revised by Sir J. D. Hooker. The Index has been greatly enlarged to facilitate reference from other Floras, and a new Index of English and popular names has been added. Lastly, to meet the convenience of Students of limited means, the price of this volume, and also of the Handbook, has been reduced from 12*s.* to 10*s.* 6*d.*, the Publishers relying upon an increased sale to compensate them for the surrender thus made. In this volume and the "Handbook" combined, therefore, Students will now have a complete Illustrated British Flora, the best, especially for beginners, for one guinea.

London, *March 22nd*, 1887.

NOTE TO THE THIRD EDITION.

In this Edition four new cuts have been added, and the whole rearranged in accordance with the newly revised Sixth Edition of the "Handbook."
